Roseheart HOA
House and Light Pole Plaques Guidelines

House and Light Pole Plaques
1. For residents wishing to add a street number plaque to their home, or to replace the address plaque on their light post, pre-approved plaques and ordering instructions can be found on the Roseheart web site under the ACC tab on the left.
2. Alternately, residents may substitute a plaque which is equal to the pre-approved plaque. Substitutions should be made of cast aluminum and be rated for exterior use. A serif style font similar to that on the pre-approved plaque should be used, as should the colors. All substitutions must be approved by the ACC.
a. Plaques on homes shall measure 7.25" high x 16" long,
b. Plaques on pole lights shall measure 4" wide x 19" high.
3. For residents concerned about nighttime visibility of the address on the front light pole, a single ground-level accent light can be installed to better illuminate the address on the pole.

ACC Pre-Approved Post Light Address Plaques
For residents needing to replace the address plaque on their light post, the preapproved "Windsor Vertical Standard Address Plaque" by Whitehall Products in Black/ Gold or Green/Gold may be used. These plaques are available online from Mailbox Universe, part #WHT-3005.

ACC Pre-Approved House Address Plaques
For residents wishing to add a street number plaque to their home, the pre-approved "Hartford Address Plaque" in Black/Gold or Green/Gold may be used. These plaques are available online from SmartSign.com Part #WP 3014.

Coordination with the House Numbering Policy
This guideline is intended to be coordinated with the House Numbering Policy. For example, the list of grandfathered residences is detailed only in the House Number Policy.
The House and Light Pole Plaque Guideline will be used to reflect updates including vendors, websites and other similar information.
