

## **Roseheart Homeowner's comments on Little Joe's Painting**

Before starting, he power washed the soffit and fascia. Then hand cleaned the gutters to remove all mildew and grime. Areas with dry rot were replaced. Behr premium paint was used. First they chalked thoroughly, then spray painted the soffits. The second coat was hand painted. The fascia was hand painted twice.

The painters were very careful not to disturb anything. All areas were covered and masked off very carefully. I was thoroughly impressed with their politeness.
